

The tail lift scale is developed for mobile weighing and is used when loading or unloading from a tail gate. A robust platform scale is integrated in the lift and is connected to an indicator installed in the cabin or in the in lorry. A printer can be connected for printing receipts or ADR documents.

- Accurate weighing directly on the vehicle
- Legal for trade approved according to OIML R76
- Increase utility rate
- Avoid overloading and costly wear and tare
- Easy to use
- Robust construction with long life
- Low investment cost and easy maintenance
- Can be extended with OBC and RFID-system
- Printer for receipt and ADR documentation

Capacity: 1500 kg
Accuracy: 2 kg
Class III or IIII
